What Your Maths Project Instructions Mean

You asked: Maths Project -1 Draw a butterfly and colour according to the answer. Page no 36 Project - 2 Draw a flower and colour according to the (Do this in your project note)
Researched Nov 4, 2026

Your homework has **two drawing-and-colouring projects.** The instructions are incomplete, so do not guess the colours or maths answers yet.

Project 1: Butterfly

You need to:

1. Draw a butterfly.
2. Look at **page 36.**
3. Colour the butterfly according to the answers or colour rules on that page.

The page 36 questions, answers, and colour key are not included here. Those details decide which parts of the butterfly get each colour. Use a pencil first, then colour only when you can see the page clearly.

In your project notebook, you can prepare now:

- Write **Maths Project – 1** neatly at the top.
- Draw a large butterfly with two upper wings, two lower wings, a body, and two antennae.
- Leave enough space in each wing section for colouring.
- Add numbered sections only if page 36 has matching question numbers.

Project 2: Flower

You need to draw a flower and colour it according to the instruction after the words **"according to the"**.

That part of the instruction is missing. It may tell you to colour by maths answers, numbers, shapes, or a colour code. Draw the flower in pencil, but wait before colouring it.

You can prepare your page by:

- Writing **Maths Project – 2** neatly.
- Drawing a large flower with a centre, petals, a stem, and leaves.
- Making the petals large enough to colour easily.

A clear photo of page 36 and the rest of the Project 2 instruction is needed before the correct colours can be worked out.
